"You want a glass?" she asked. "The bottle's probably cleaner." "Has to be," she agreed as she headed. Wellesley, Borftein, and Lechat were standing helpless and petrified in the middle of the floor. "He'll do it," Celia whispered, horrified, to Bernard. "I just employ advanced and complex techniques." She shivered at the thought and got up from the sofa to find Bernard. No doubt he would be in the basement room that he and Jay had made into a workshop to supplement the village's communal facility. Bernard had been taking more interest in Jay's locomotive lately than he had on the Mayflower II. Jean suspected he was doing so to induce Jay to spend more time at home and allay some of the misgivings that she had been having. But his enthusiasm hadn't prevented Jay from going off on his own into Franklin, sometimes until late into the evening, after spending hours in the bathroom fussing with his hair, matching shirts and pants in endless combinations with a taste that Jean had never known he had, and experimenting with neckties, which he'd never bothered with before in his life unless told to. Whatever he was up to, Marie at least, mercifully, was managing to occupy herself with her own friends and to stay inside the complex. "Who's Colman?" Lechat inquired, seeking a bench for her knees. "You'd better believe it," Lechat promised. "Mrs. D, you don't mind she- calls your brother a selfish pig?" "Sadly, dear, it's true." "bring us all together." "years ago. A wickedly messed-up kid. Selling drugs, doing drugs, violent just for the thrill of it, mixed up." "It's Wednesday, I think," Rickster said, and nodded toward the sundae in his hand. "The FBI, the National Security Agency, and other legitimate authorities won't kill Curtis immediately." "Do you want us to have to drag you there?" "I know," Kath told him. "He's through to Otto 'and Chester as well via one of our relay satellites. It's a three" way hookup." "through the serried arches of her steepled fingers." "I just did." "And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source. untouched. The hatred subsides as quickly as it flourished, and the grief that was briefly drowned by this." "Nobody told me anything." "The family robot, which hadn't been able to manage the crate either, perched itself on the tailgate and sat swinging its legs while the soldiers escorted the Chironians to the ground car behind, where two younger children and their mother waited. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians.. The driver pops the hand brake. As the vehicle angles off the shoulder and onto the pavement, the tires. In this darker night, several structures loom, all humble and yet mysterious. A barn, a stable, INSIDE THE LOCAL command post behind the Hexagon's armored bulkhead, Major Lesley of the Special Duty Force was still too stunned by what he had heard to be capable of a coherent reaction for the moment. He stared at the companel where a screen showed a view from the Columbia District, where the SD guard commander had entered the Communications Center under a truce flag some minutes previously to talk with Borftein, and tried to separate the conflicting emotions in his head. Captain Jarvis, Lesley's adjutant officer, and Lieutenant Charez watched in silence while around the command post the duty staff averted their eyes and occupied themselves with their own thoughts. His dilemma was not so much having to choose between conflicting orders for the first time in his life, for their order of precedence was plain enough and he had no duty to serve somebody who had usurped rank and criminally abused the power of command, but deciding which side he wanted to be on. Though Borftein was waving the credentials, Stormbel was holding the gun.. In the bathroom though the far door of the bedroom behind the lounge, Veronica was already stripping off her fatigues and boots, which she then stowed beneath the towels in the linen closet. By the time the outside door to the suite finally closed to cut off the noises from the house and envelop the rooms in silence, she was putting on the flight-attendant's uniform except for the shoes. After that she used Celia's things to attend to her makeup.. "I'm not sure Lukipela's dad and mine are the same. Sensemilla's never said. She might not know herself." "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and. create our own concentrations on a miniature scale to inject energy from .... let's. call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes

it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory.".authorities. He shoves the currency into his pockets once more..rising to check out their new circumstances, the boy says worriedly, "We've got to keep moving." "We'll work out something. Where and when?" Hanlon said. Colman looked over at Veronica.. "Love. I thought you would say love is the answer." Her sweet gamine face wasn't designed for ironic.lottery numbers, start fires with the power of my mind, and teleport to Paris for lunch.".they are here on Earth or cruising distant avenues of the universe..even long after sundown, is extremely debilitating. They have hardly begun to run, and already he feels.Geneva smiled. "If there was an altercation, dear, I'm sure you started it." .shouting. "FBI! FBI! Freeze, freeze, freeze!" .tried to settle his nerves..final bill you mentioned?".He nodded. "It's all in the Neiman Marcus bag." He hesitated, but then decided that this woman's.Leilani's hard-pounding heart seemed to clunk as arrhythmically and as awkwardly as a panicked girl."You too." The image vanished from the screen..the tattoo snake. "At least take a look at his peace offering." .Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." .Her name was Wendy Quail. New to the staff. He'd only met her once before, but he had a cop's.In the houses that he passed, Noah saw only a few puzzled or wary faces pressed to lighted windows.. "Everyone I talked to about a job." .Angry murmurs were heard from the Terran civilians.. "Who are you?" he demanded. The formality had evaporated from his voice. "Are you in authority here? If so, what are your rank and title?"
